

Bioshield: Who scio-vouched it?

How boutcha science right-hand-man in all this cash-cowing?

Cometh the hour - cometh the man - take a bow - Anthony S. [Fauci](#)

Right-in-the-thick-of-it - pleading for BioShield before Congress - a leading advocate/recipient - Fauch the Pouch: siphoned billions from that very same fountain spouting public dollars in the name of fighting bioterrorism - it was the making of his NIAID kingdom.

As he said at the hearings in April 2003:

*The accelerated development of effective **countermeasures against terrorism** requires a new research paradigm.*

Really? I'm findin - with old-fashioned paradigm thinking - admittedly - reading *between the lines* - your *new paradigm* scheme of *accelerated development...?* was a ticking time-bomb that detonated - in 2019

Anthony: *The events of September 11, and the subsequent anthrax attacks have **changed, for ever**, how the **biomedical community** responds to **emerging threats**.*

You betcha! That's a radical shift in thinking though - *forever* - as you said. Gotta ask the question - is that a good thing?

[The Fouch](#): *We are now on a wartime footing and are **compelled to modify the way we do business**.*

Hell! Our brave bio-warrior general from NIH - ready ta do: *whatever it takes*.

Btw, who's the drug-pumping-muscle in this bio-war-on-terror?

[The Fouch](#): *Biotech firms are our industrial partners - they are essential to countermeasure development.*

So - to weigh it up - a surge of money into the likes of - Pfizer, Merk, Emergent Biosolutions - a big-pharma arms-race - run by Fauci to counter a non-existent enemy.

The Fouch: But **they want some assurances** if they are **successful** that there'll be a **market for their product**.

Guess they got it. Never mind that antibiotics work fine on Anthrax symptoms - it was pure scio-politics - in-fact-in-the - US at the time - there was a rush on Cipro - today's Ivermectin? Guessin the health experts are gettin wiser - restrictin its availability - thinking of our best interests - to lessen bio-state hesitancy. But i degrees ...

Pop question ... who executed the Anthrax terrorist attack that ignited this funding-feeding-frenzy?

Extra points: What was their reasoning?
