Singularity

Instinct is DNA DNA is Desire to Exist Desire needs an object

another Thought to bounce off

a second guess a question the first dichotomy Sancho & Don Quixote all in the one head

name a law of physics thought'll mirror it - thought is it

a meta-physical energy outliving death birth everything

at its core non-existence a state of Oneness

the portal between observed/not observed yet a chook raffle that moment where the tickets are all in the hat

Chance in with a chance of Entanglement expanding accelerating Desire to happen to influence

Listen to the lord Jesus I love you please Jesus more than myself Listen to the Lord where am I going help me Jesus 21 22 23 24 25 26 27 28

Every branching path finds its way home to a Singularity from whence it came

We're capable of understanding btw we're great at it art love yoga our portals people invented religion totalitarianism

Singularity doesn't care if it kumbuyas you or bomb-bye-ya arse

Now robots have entered the race better go faster connect networks leading to Essences pre-existing in a suspended balanced state

Nolan always said everything can be understood good bad all of it everything

Balance implies imbalance a highwire act the pent up stillness of every possibility contained

zen

a millpond swallowing the dark-thought soup of what happened what didn't what easily could've what might

the spectrum

a self-generating probability the thrill of the error racing away wanting to re-unite with its essence where it belongs swirling back into a state of harmony disappearing *fuck you* up its own bung-hole

(bang)
