

# Singularity

Instinct is DNA      DNA is Desire to Exist      Desire needs an object

another Thought to bounce off

a second guess   a question the first dichotomy   Sancho & Don Quixote   all in the one head

*name a law of physics   thought'll mirror it - thought is it*

a meta-physical energy   outliving death   birth   everything

at its core      non-existence      a state of Oneness

the portal between observed/not observed yet      a chook raffle      that moment where the tickets are all in the hat

Chance   in with a chance of Entanglement   expanding   accelerating   Desire   to happen to influence

*Listen to the lord Jesus   I love you please Jesus more than myself   Listen to the Lord   where am I going   help me Jesus   21 22 23 24 25 26 27 28*

Every branching path finds its way home to a Singularity from whence it came

We're capable of understanding   btw   we're great at it   art   love   yoga   our portals   people invented   religion   totalitarianism

Singularity doesn't care if it kumbuyas you or bomb-bye-ya arse

Now robots have entered the race   better go faster connect networks leading to Essences pre-existing in a suspended balanced state

*Nolan always said   everything can be understood   good bad all of it   everything*

Balance implies imbalance   a highwire act   the pent up stillness of every possibility contained  
zen

a millpond swallowing the dark-thought soup of   what happened   what didn't   what easily could've   what might

the spectrum

a self-generating probability   the thrill of the error   racing away   wanting to re-unite   with its  
essence   where it belongs   swirling back   into a state of harmony   disappearing   *fuck*  
*you*   up its own bung-hole

(bang)
