

# Singularity

Instinct is DNA    DNA is Desire to Exist    Desire needs an object

another Thought to bounce off

a second guess    a question the first dichotomy    Sancho & Don Quixote    all in the one head

*name a law of physics    thought'll mirror it - thought is it*

a meta-physical energy    outliving death    birth    everything

at its core    non-existence    a state of Oneness

the portal between observed/not observed yet    a chook raffle    that moment where the tickets are all in the hat

Chance    in with a chance of Entanglement    expanding    accelerating    Desire    to happen to influence

*Listen to the lord Jesus    I love you please Jesus more than myself    Listen to the Lord    where am I going    help me Jesus    21 22 23 24 25 26 27 28*

Every branching path finds its way home to a Singularity from whence it came

We're capable of understanding    btw we're great at it    art    love    yoga    our portals    people invented    religion    totalitarianism

Singularity doesn't care if it kumbuyas you or bomb-bye-ya arse

Now robots have entered the race    better go faster connect networks leading to Essences pre-existing in a suspended balanced state

*Nolan always said    everything can be understood    good bad all of it    everything*

Balance implies imbalance    a highwire act    the pent up stillness of every possibility contained  
zen

a millpond swallowing the dark-thought soup of    what happened    what didn't    what easily could've    what might

the spectrum

a self-generating probability    the thrill of the error    racing away    wanting to re-unite    with its  
essence    where it belongs    swirling back    into a state of harmony    disappearing    *fuck*  
*you*    up its own bung-hole

(bang)
