Conclusions

(Under construction) **Review of Evidence:**

Actual No Evidence (as distinct from the Zoonati's *no evidence* - coz research into it is *Suppressed/Banned - WIV's data-base* for example - interrogation of key suspects - unredacted email communications of key-suspects - the internal THE Science banning of any scientists who disagreed with the Natural Origin fairytale)

According to Daszak/Shi, there is *no evidence* of ***direct transmission*** *of SARSr-CoVs from bats to people* - that have caused discernible illness.

There is *no evidence* of pangolin or any other wild animal acting as an intermediate species between bats (for which there's *no evidence*) & humans - unless you count T*HE Scientists* as an *intermediate species* - &/or the caged lab-animals, including pangolin, through which bat viruses were cruelly passaged.

That goes for SARSes-1 & 2. (we elsewhere investigated the myth that civets caused SARS-1)

There's *no evidence* that climate-change or deforestation caused Covid - or any other coronavirus outbreak.

Even if there was a crossover event, for which there's *no evidence,* it still doesn't explain how a highly contagious virus ended up in Wuhan - without causing an outbreak anywhere else. *World Health Organization* Investigator/Expert, Dominic Dwyer floated the *Cold-Chain-Hypothesis* - designed to get The Origin *the-fuck-outta-Wuhan*. In fact, China totally. Researched exhaustively (at taxpayers' expense, like all of the above), but ... *no evidence*.

There is *no evidence* that bats or pangolin were sold at the Nanhua Seafood Market. It's not something that's sold there. Which means there's no evidence for the entire *wet-market-intermediate-species* theory ... period

Actual Evidence:

There is evidence that a *super-contagious(h2h)-bat-virus* geographically broke-out right-next-door to WIV, the world's leading institute in GoF engineering super-contagious(h2h)-bat-viruses.

There is evidence that the *World's Top-Scientists* insisted the CCP (totalitarian) regime were *Open & Transparent*.

There is evidence that anyone who said otherwise was banned/branded a *Conspiracy Theorist* by self-same *Experts*.

There is a *mountain of evidence* detailing Celebrity Scientists spreading disinformation and *fear-mongering* in order to pump up the notion that dangerous bat-viruses are lurking everywhere.

There is evidence of virus lab-leaks happening before. Many times.

There is evidence that Covid's spike protein was tampered with in a lab. Even the *Prox-O-5* thought that.

There is evidence that EHA/WIV performed *GoF* experiments on bat-viruses & passaged them through other animals (in order to cause mutations).

There is *evidence*, uncovered by *DRASTIC*, that the WIV database, which was meant to be internationally accessible, was taken off-line on Sep 12, 2019.

There is *glaring evidence* that those Celebrity Scientists who were most vociferous in parroting the CCP's version of Covid, have CCP COIs.

There is *evidence* that these scientists have vested financial interests in covering-up a lab-exit.

There is evidence that two of the main authors of the notorious Proximal Origin paper (Andersen & Garry), who thought Covid *looks engineered,* received grants over $25.2 million between 2020 and 2022 from the NIH,

There is *evidence* that our Celebrity Scientists initially downplayed the severity of Covid, denied human-to-human transmission, introduced a dud-test-kit, advised against wearing masks or closing the borders with China ... during the crucial early stages ... when the international spread of Covid still could have been avoided.

We're talking about incredibly serious charges here - causing, then covering-up a disease that killed 15 million people ... & counting (downwards, weirdly, according to WHO's score-keeping, it's gone down to 6.8 mil - guess they're gettin nervous about the lawsuits ... though even 6.8 mil killed is a lotta life sentences), & ... precipitated a draconian, global crackdown on all human rights. So *full-Atrocity*-level. *Therefore*; we can deduce they must've had some powerful motivations.

Recap of those motivations:

Money - lots of it. Daszak is calling for *billions-of-dollars* in funding to pursue his unsubstantiated zoonotic crossover theories & all the risky GoF experiments associated with that. Meanwhile, the authors of the pangolin paper (Andersen, Holmes, Lipkin, Garry, Rambaut) have all received

massive funding grants totaling many millions. *Virus Hunting*, which took off after 911/Anthrax, is still riding the exponential curve.

On the other hand, revelations of a lab-leak would, hopefully, see a strong contraction in funding for high-risk facilities such as WIV, and a re-introduction of the ban on GoF experiments. To this day, not a single benefit to mankind has come from GoF experiments, while the cost has been astronomical. Sure as night-follows-day, GoF will cause another pandemic if its allowed to continue.

Celebrity status. Fame is addictive - for those that are prone to craving it - like any other drug.

Power. Also addictive/corruptive. In the *Brave New-Normal* of data-centralization & surveillance, our guys, almost exclusively men, are on the right side of that power imbalance. They are the top-experts - who keep telling us to *listen to the experts*.

There is a stack more easily refutable "arrant nonsense", as Richard Ebright puts it, being spouted by the top-experts. It's a steady-stream that goes on to this day. But at some point you need to step back out of their weeds and focus on what's important.

How did it happen? Probably a Lab Accident involving an engineered bat-virus (in which pangolin was a likely ingredient).

Can that be proved definitively? Yes. Most likely already has been - by the CCP's internal investigation.

Will the outside world ever be granted access to this data-base evidence? No. Forget about it.

Does that mean we can never know for sure? No. There's more than enough evidence (see above) to make a *beyond-reasonable-doubt* conclusion. Including hard evidence of an orchestrated cover-up. The cover-up *is* the smoking-gun. You don't commit gross academic fraud to shield a totalitarian regime for the fun of it. Only reason to do that is if Covid was an engineered lab-event.

Interrogation of the leading persons-of-interest, including Daszak, Baric, Fauci, Collins, Farrar, & the Prox-O-5would provide even further evidence. The fact hasn't been done already is evidence that the authorities don't want to know - it's too embarrassing/de-stabilizing for the whole expert-ruled-system that we live under.

Why does knowing the origin matter? Apart from the obvious - holding those responsible for the deaths of millions - we don't want it to happen again. Which it certainly will if there's no accountability.

In addition, an awful lot of big-state surveillance has been downloaded onto the population - all of which is being justified by Covid. New precedent benchmarks have been established for winding

back basic human freedoms. The cruel irony is that we're being required to accept these invasive security measures dictated to us by the science-experts ... due to ... a security lapse at a lab *by* science-experts.

Are we living in a world where the top-experts, super-sized by their media platforms, are spreading CCP propaganda and lying to us? Yes.

The last question is: *What can we do to fight against that?*

We'll explore that next ...
