

Ch 4: The Lancet Statement

The old one-two: Nature's Prox was THE science - Lancet THE scientists endorsing it. Case closed.

- [Lancet Statement](#)

Lancet Statement

The Lancet Statement:

- published Feb 19
- composed by Daszak/EcoHealth - purpose written to quell *conspiracy theories* - authorship not disclosed (revealed Feb 2021 in FOI emails obtained by US Right to Know)
- signed by 27 *world-leading-experts* - several employed by EcoHealth - all of whom are now historical figures
- Sir Jeremy was the biggest-fish signatory - vetted final draft - Wellcome is politically aligned with the Eco/One Health Initiative
- Wellcome has funded research at WIV
- Farrar's VIZIONS projects are published by EcoHealth Alliance
- Christian Drosten, Covid *Tsar of Germany*, 2nd biggest fish signed
- cross-pollination galore with Prox O authors/WHO/Farrar/Fauci/Majors
- spread virally around the world as a petition you could sign
- Last time i checked, 23 000 people had signed - that was a few months ago (mid 2021) - pretty sure no-one's signed-up recently
- pumped by all media as gospel - science gospel - everything else was a right-wing conspiracy theory

From the time of publication/PR push of Prox-O & Lancet Statement- whatever anyone subsequently thought, heard, spoke, read, wrote, felt - in regard to Covid *not* being a lab-escape - its origin lies in these two documents. They are historical artefacts of the highest order.

Sir Jeremy Farrar was *in-the-thick-of* both of them. Calling the shots.

As Francis Collins says: *Thanks for your leadership on this critical and sensitive issue.*

If King Arthur of Genomics is thanking you for your leadership - in organizing the pivotal meeting on *the response to the biggest catastrophe since WW2* -then you're in historically rarefied air.

Released as a coordinated offensive, these two *info-weapons* were:

- purpose-written to provide heavyweight global support for a joint scientists/CCP version of Covid.
- mega-platformed by all science mags - to the exclusion of all else.

- used by social media giants to ban subjects suggesting the virus may have been engineered in an Wuhan lab.
- pumped-up with a saturation media push by our celebrity scientist/influencers to entrench *natural origin*/vilify the conspiracy theorists.

When it came to disseminating *Covid misinformation and conjecture* to the entirety of the planet - at *the crucial time in the-history-of-everything* - when the truth would have made *all-the-difference* - man - you guys hit humanity out of the park - into your own engineered parallel universe.

I marvel at the audacity - the scale of deception - as much as the catastrophic consequences.

Farrar - Lancet Statement

(Edit: FOI emails released after i wrote this only further support what we've contended - the Lancet Statement was a politically contrived info-weapon - i will add a page or two on them later. In the meantime, Feb 6 Daszak says in one of them:

*I'll send it round some other **key people** tonight.*

You can bet the farm that he was talking about Sir Jeremy Farrar - a whole other step up in the food-chain from Pete & his band of EcoHealth warriors.)

So let's see exactly what it was that Jeremy Farrar helped orchestrate - then signed - with the full might of Wellcome Trust behind him.

The Lancet Statement: *The **rapid, open, and transparent** sharing of data on this outbreak is now being threatened by rumours and misinformation around its origins. .. We **stand together** to strongly condemn conspiracy theories suggesting that COVID-19 does not have a natural origin.*

We support the call from the Director-General of WHO (Teddy Bear) to promote scientific evidence and unity over misinformation and conjecture.

*We sign this statement in **solidarity** with all scientists and health professionals in China .. We declare **no competing interests**.*

When i read that first time, it blew me away. Straight off i knew the primary claims were false - easily disprovable - 3-move checkmate:

- The Wuhan labs in question are state-run bio-defense facilities.
- China is run by a totalitarian regime.
- The idea that the CCP (or USAMRIID for that matter) (and all those working under their rule in these labs) would be *open and transparent* is beyond stupid.

So what's beyond stupid?

- *Corruption* -

It's the only explanation. This is where you don't need to be a scientist to solve the origin of Covid - probably better if you're not - despite what you're constantly told.

If *27 of the world's leading scientists* are saying: a totalitarian regime is *open and transparent* - straight away that *statement* tells you the world's leading experts are lying. In a coordinated way.

Basic follow-up shows glaring COI's amongst the authors/signatories.

Then you ask: *Why are they lying?*

The only answer is: Covid was a lab-exit that needs to be covered up - for the common good. (or: our leading experts are incredibly stupid)

By using *power* to quash legitimate speculation we might be dealing with:

an escaped, engineered super-bug from a bio-weapons/defense lab (!)

- knowledge that potentially would have *shocked the world(!)* into taking action to stop the international spread of the virus - these scientists have directly contributed to:

- *the deaths of millions* -

whilst justifying extremist restrictions on

- *basic human freedoms* -

That's atrocious behaviour. Those that wrote/signed/pedalled these documents, including Sir Jeremy, will go down in infamy - so long as humanity (then AI) shall exist ...

(unless they win of course - which they may very well do - in which case they'll be heroes - i doubt AI's gonna fall for it though)
