Crime and Punishment

How to deal with the perps

- Crime and Punishment

Crime and Punishment

Crime: *potentially* killed millions/departicilized human freedoms

Punishment: I’m not vindictive. It’s a negative black-hole energy. Dead against mob vilification whoever it’s aimed at. Even you guys. If it comes to that, i'll be there urging mercy on your behalf. Let’s hope our voices are not censored this time.

But for the sake of reform, at least:

1. *Stop it.* You can’t continue in your job. You're fired.
2. Return the money you received whilst engaging in the crime/cover-up.
3. Repent - Truth and Reconciliation style

That goes for all of those who caused/covered-up the Covid Atrocity.

That roll-call will include:

90% of *the* *science community:* either complicit or stupid - both need fixing

Heads of security organizations who: non-investigated the *crime of the millennium* when the answer was staring them in the face.

The media: If FFC/CCP's audacious One-Everything plan comes off, then at the *Hunger Games* acceptance speech ceremony - with slides on a giant screen/music depicting heroic moments in the victory of true believers - somewhere in that speech he'll say:

And i'd like to give a big warm thank you to the media tycoons - without whom none of this would have been possible.

Yeah-no. Stop it - give back the money - truth and reconciliation

You don’t even have to go to jail - or whatever the punishment is in various countries for committing/aiding & abetting an atrocity.

If you accept the above, you’re free to go. Deal?

Oh, we couldn’t do that.

Why not?

It would denigrate all the leaders involved, that’s virtually everyone!

It's a lot, yeah, it's a cultural problem

*You're talking about **the** science, media, corporations, cyber-gazillionaires, political party machines, security organizations - you want the leaders of all that lot to come forward - be held accountable? To lose their jobs?!*

Yes. Of course

(scoffs) Impossible. You're not living in the real world. How would the planet even run if you took away it's global leaders? It's a ridiculous idea. We're too big to fail. It would mean:

- *the collapse of society* -

I disagree. The Animal bio-Farm-state you've unfurled upon us - due to a disease *you* caused, *is*

- *the collapse of society* -

The above is the only way to fix the foundations. Get back to

- *what's true* - *or not* -

as scary as that sounds
