Peter Daszak

Daszak's EcoHealth Alliance - the Bat Cave of Calamity:

Daszak was on the radar early coz he put himself on it - pumping the press as hard as Lipkin - with similar CCP COI's - reveling in the Celebrity Scientist persona. Not dissimilar to Bruce Ivins with Anthrax (who was an FBI advisor on the case) - he may also share a similar fate. Those investigating Covid knew Daszak was a *goldmine of dodginess* - the shock was when he was appointed as a WHO investigator - the sheer fuck-you-ness of that. We don't care if you know - we're gonna steamroll on...

In the spirit of transitioning from bioterrorism to *fear of nature* - Daszak was a passionate narrator.

Daszak: *It's a little bit like if you **listen to phone calls** from Afghanistan. To **find the terrorists**, you have to listen to **all** the phone calls. Only when you've heard the phone call do you then go in and find out who these people are and **disrupt** those networks.*

It's hard to know if he's talking about the common cold or conspiracy theorists.

Eco-evangelist: *Rampant deforestation, uncontrolled expansion of agriculture, intensive farming, mining and infrastructure development, as well as the exploitation of wild species have created a* ***'perfect storm'*** *for the spillover of diseases from wildlife to people.*

Here's what i think of that:

Rampant GoF experimentation, uncontrolled expansion of bio-science funding, intensive research, unaccountablility, and infrastructure development, as well as the exploitation of wild species in cruel lab experiments have created a ***'perfect storm'*** *for the spillover of diseases from scientists to people.*

My take on Daszak: a talentless scientist from Bangor University with self-aggrandizing gab-skills - that worked for a long time on gullible idiots and those higher-ups who saw him as as a maverick soldier who served their purposes - long enough to float EcoHealth Alliance on the One Health sea - long enough to sink the world in itsOne-Everything black-hole.

Pretty sure it was @billybostickson sent me the link - Raul Diego reported back in July 2020 (when *conspiracy theorist* vilification was *all-the-rage*, Daszak was a mega-platformed *darling of the press*):

*In 2017, the U.S. Department of Defense awarded a $6.5 million contract to a company called EcoHealth Alliance, Inc to carry out research on "****the risk*** *of bat-borne zoonotic disease emergence in Western Asia". Journalist* ***Dilyana Gaytandzhieva*** *uncovered the Pentagon project, which focused on "genetic studies on coronaviruses in 5,000 bats".* (Good *uncovering* by Dilyana Gaytandzhieva. Well done Raul for writing-it-up/spreading the word whilst crediting her.)

New York Post: *(B)y far the largest donor to EcoHealth was the* ***Department of Defense****, which has given Daszak more than $40 million since 2014,* ***almost all of it*** *through its Defense Threat Reduction Agency, for the stated purpose of "combating weapons of mass destruction."*

How ironic. EcoHealth *was* the weapon of mass destruction - potentially.

A former EcoHealth employee (Andrew Huff - Billy Bostickson has compiled info here) *says Daszak disclosed some years ago that he had been "****approached by the CIA in late 2015.****"* (my brackets)

Andrew Huff has made himself a character in all this. The name Huff is a good one. He does Huff n Puff - enjoys his insider celebrity status on Twitter. You could dismiss him - or you could think - *well, we'd pegged EcoHealth as dodgy - if he wasn't Better Call Saulish he wouldn't be authentic.*

The employee believed that the CIA helped steer large chunks of federal funding to EcoHealth's projects in parts of the world like China where they needed "human intelligence related to biological threats and capabilities. Many of these places are hard to collect good intelligence ...

Also, [the Department of Defense] was actively always asking for data, models, and analysis."

The imputation is Daszak was spying for the CIA at WIV - to somehow stop bio-terrorism.

Then came out swinging for the CCP when Covid broke. How could that be?

Unless: their little bio-weapons spy games blew up in their faces. One way or another, the virus borne of that collaboration exited the building. Now whaddya gonna do?

Suddenly it made sense for intelligence agencies to be on the same side. For the sake of saving/increasing/entrenching The New World Order - which is the same as the Old World Order - but more *United* - for the *more* common good.

I don't know. How would you explain working for the CIA against the CCP one minute - praising/lying-to-protect the CCP the next?

Then the public-money-funded sham-investigations conducted by WHO and **all** other world intelligence agencies? Mostly not even a sham investigation. Nothing. In Australia they have a Royal Commission investigation at the drop of a hat, but nothing looking into the greatest humanity-shaping event of our time?

Let me guess: *Now's not the right time to talk about it. Let's wait until we've all moved on.*

Good News for Bad Actors: A lot of culpable scientist/intelligence folk are gonna walk away from their involvement in the Covid Atrocity unscathed.

The Bad News: Not so fast Pete.

It's not that you're a scape-goat exactly, you've earned it, but you will be made-out as the rogue scientist acting alone to carry as much blame as possible - same as Bruce Ivins. *So we can learn from past missteps and become even better leaders going forward as we continue to deal with emerging bio-eventualities*.

The Good Bad News: There will be a reluctance to investigate/charge you - due to you *knowing too much* - though maybe you'll get the Bruce Ivins treatment - hounded to death without being charged - to avoid details coming out.

Go down swinging Pete - spill the beans on all of those fuckers *now* while you can!

I don't even know if escape-goating to China is an option anymore - you may well get arrested there at the airport. In fact, that would solve a lot of problems for both sides.
