THE Covid Inquiry - Aussie-style

Under construction book - will add chapters over next couple of months

- THE Covid Inquiry
- THE Next One
- Stay Positive
- Terms of Reference - Drug Use

THE Covid Inquiry

Albanese, Sep 21, 23: *Today, we have an an announcement of, ah,* ***The COVID Inquiry****. That is important that it take place.*

Great, *THE* (definitive) *Covid Inquiry*! Finally, we can get to the bottom of what caused this catastrophe. Thought we'd never see the day …

We ***said*** *before The Election and I've* ***said*** *since .. given the* ***enormous dislocation****, the stress, the,* ***of course, ah, loss of life*** *…*
(despite Dan Andrews et al's *Heroic Efforts* to: *Save Lives* (which, in turn, was used to justify: *THE War on Freedom))*
… the ***Economic Impact of the pandemic*** (World Record Corporate Profits - moved off-shore from the pockets of normal people)*, it is appropriate.*

Shit yeah!

It's a ***commitment*** *that I made before the election. And one of the things that we've been doing is* ***ticking off*** *all those* ***commitments*** *that we have* ***made****.*

Yeah, let's not get ahead of ourselves, Albo, with the *ticking off* part - we don't know what the deal is with your *THE Covid Inquiry* yet …
What if it's one of those tricky *New Normal* jobs? Where the goal is to:
bury the truth - not *reveal* it …?
Not saying you're doing that - coz complicity in covering-up Covid … to benefit … *THE CCP* …?(!) … whose top Bat Lab plausibly caused it … in close-conjunction with: several *Aussie Celebrity-Scientists* …
That would be giving *aid & comfort to THE Enemy of Freedom*: *Totalitarianism*
Would it not … ?
Now wielding: *THE Ultimate Weapon*:

AI

On a subject where it's hard to find common-ground, we can agree that's a dangerous formula:
Totalitarianism x AI-ism x Globlalism = *bad shit, no ?*
Lest we forget, *Our Soldiers* died protecting us against that corruptive dark-urge in humanity's high-wire balancing act

But of course, Australians will ***recall****, will* ***never forget****, what the country went through in* ***2020 and 2021 in particular*** **(**& 2022, 23, 20-forever. It did irreversibly alter *THE Course of Humanity* …)

It was a time where Australians joined together*.*

Hmmm … not sure about that one, Albo. For a start we were: *locked down,* right?
There was an actual *BAN* on: *joining together*
Anyone who tried was demonized, fined &/or arrested, as i *recall, will never forget*.

Or you're speaking metaphorically ? We *joined together* in *virtual/spiritual space* … socially distantly together?
Even then it's: a *non-truth*
People have never been more divided … due to:
Covid
It drove a *wedge* into society. That's a base-line fact
Family members stopped speaking to each other …

They (not We?) ***made*** (were required to make) ***sacrifices to help each other****.* ***They*** *sacrificed some of the* ***normal activity*** (all Freedoms) *that would go on. And it was a very* ***disruptive**** *period in our lives.*

Let's not forget, our frontline *Freedom Protesters*, if we're recording history here. *They* also *made sacrifices* to voice dissent to: an insane power-grab by: *off-the-leash Premiers*2*

These citizens, for their troubles, got vilified with the full-might of MSM, fined (50,150 Covid-fines issued in Danistan alone, totalling more than $100m! You could list that as an ASX Company),

censored, segregated, arrested, maced, shot at, had their heads slammed into the concrete …

(*Apart from the 15 mil n counting, Covid also killed off *Disruptive* as a buzzword. Once a disruptor has disrupted, last thing ya want is some other bugger disrupting *Your Disruption*)

(*2 note in case i forget: Why does our constitution permit Premiers to indulge their little-Hitler Fantasies in: a *National Emergency*? Wouldn't the Federal Government be responsible for directing a response to a National/International event - biggest since WW2?
Guess we'll delve into that abrogation of responsibility to the State Premiers, & how that worked out, in: *THE Covid Investigation*)

THE Next One

Albanese: *But **we** got through it. And we got through it in a way that was **positive** in most respects.*

Depends whether you see a Penal Colony setting a *New World Record* for - *Lockdowns* - as a *positive* image-thing, *going forward* - or: not …

*But we need to examine what went right, what could be done better, with **a focus on the future.***

Hang on Albo … isn't the whole idea of an investigation to:
focus on the past?
To unpack what the heck happened there?
Lotta folks doid - it's kinda like a murder investigation

Wouldn't you wanna know whoi they doid?
Saving Loives was used, ad nauseam, as *THE Premise* for activating a scary police-state crackdown on freedoms of: speech, movement, assembly - & roights to prorivacy. Basically: all freedoms
We can still discuss whether you were roight or wrong to take these extremist steps, but to do that, a real investigation must examine the root cause. That requires *dwelling on the past* No? Whoi* not?

*Because **The Health Experts and The Science tells us** that this pandemic may well be, **indeed**, is **not likely** to be **the last one** that **occurs**.*

Ohr, i see, yeah, *THE Health Experts & THE Science* would know - having likely caused *This One*
.
Personally, I'm fed-up with *THE Experts telling us* what to do. They were (a) wrong (b) got angry at/banned anyone who tried to warn them

These Celebrity Scientists, brazenly fear-mongering (to get more money) about *THE Next One*, are:

persons-of-fucking-interest in: *THE This One.*

Investigate their arses. If there's no accountability for causing Covid - multiplied by pumping more money into the same *Industry* … then … appointing deep-state clogs from that *Industry* to conduct investigations into their own criminal behaviour … Yeah, sure, there'll be a *THE Next One* that *occurs*. It's Pablov's dog.

*So that's why b**etter preparedness** is very important. So the inquiry that we're announcing today will look at, as well, the **more than twenty inquiries*** (Hell! Investigating the origin? Or covering it up?) *that have already happened by people like **Dr Peter Shergold*** (Powerful Deep-State Actor - Head of corruption-prone ATSIC from its inception).

That's a lot of inquiries already! i had no idea. Even though we paid for em. Having investigated Covid's origin pretty closely - none of the above registered a peep so far as shedding light on the most important Q:

THE Origin

If they don't do that, they're a cover-up waste of public money. That will inevitably cause: *THE Next One*

Stay Positive

*One of the things that **I** want to do from **THE Lessons** as well, is to **ensure** that we're **positive,** that the **process of learning from the pandemic is constructive, rather than destructive**.*

Why? Who cares? Let the chips lie where they fall. It's an investigation. Seems like finding: *everything was/is rosy - give us more powers/money going forward* - is the only thing you do want to do from *THE Lessons*.
Goerg Hegel, a philosopher (now New-Normal-banned in Aus as an academic pursuit) was right: *The main lesson we learn from history is: we don't learn the lesson*
The Covid Inquiry is a real-time case-study of how that happens.

*One of the things **that didn't help** during **The Pandemic** was the **sort of activity** like when the Federal Government supported Clive Palmer's legal case* (against radical restrictions on Freedom of Movement)*, rather than **supported Mark McGowan and the actions that the WA Governmen**t were taking.*

Mark McGowan (+all the premiers) *& the actions his gov were taking* were vying with DanAndrews.gov's actions for: most radicalized police-state … on the planet
Within that scary fake-universe, it literally became an interstate rivalry thing.
Welcome to the opening/closure of the zero-Covid state-of-origin games. Where our leaders are sniping at each other whilst preaching unity. Whilst seeing their popularity track-up the more they spiked the exponential fear curve.
If Ego-maniac Power-grabbing was an Olympic sport, then the Aussies could well have trifected the podium. (Bronze narrowly going to Qld's Anna Palaszczuk, honorable mentions to Argentina & PRC)

*But we need to make sure **that this is forward focused** and consider all of the **Commonwealth responses** to the pandemic.*

Two points

One: you've really got this *Messaging-boner* for *the forward focus, right?* Is that what your party chat-bot machine suggested when you typed-in: strategy to cover-up the-Covid-truth?

It's weird, Albo. It will only make people suspicious. You can't have an investigation without focusing on *past events*.

Well, you can, obviously, coz here you are … announcing one ...

Terms of Reference - Drug Use

Albanese: *The terms of reference for the Inquiry include:* ***Key health measures,*** *including COVID-19* ***Vaccinations and Treatments****;*

Imaginary Press-conference:

(Real) Journalist: Australia's rates of infections & deaths shot up post-vax Rollout - will *THE Covid Inquiry* be addressing that?

Albo: *We never said vaccines would prevent severe illness & death 100% of the time. & might i add - they would have been even deader if it wasn't for the vaccines. Yes, Lucy …*

Will the Inquiry look at why Excess Deaths (non-Covid) shot up to record levels post-vax?

Ans: *No comment. As i keep saying, it's easy to criticize in hindsight but this Inquiry is focussed on THE Future … Mike …*

Lucy: Sorry, a quick follow-up, what if vaccine-falout is The Future?

Albo: I've answered your question, Lucy, we're moving on … Mike

Why was an investigation into the Excess Death-Spike, biggest since WW2, blocked by your party in the senate?

Albo: *I've already answered that & i'm not going to give anymore airtime to unproven conspiracy theories. Gillian …*
Why did the definition of fully-vaxxed change from two shots to 'like the flu shot'?

Ans: *You've answered that in your question. It was an evolving situation! Greg …*

Why was AZ pumped into Aussie veins as a *Wonder Drug* one minute - we even opened a factory mass-producing it - then stealth-banned the next?

Ans: *AZ is/was a very safe, very effective vaccine, but, thanks to Big-Pharma, we were granted access to an Even More Wonderous Wonder Jab: Pfizer & Moderna's mRNA Experimental Gene-Therapy … !* Dan …

Ivermectin is a Nobel prize winning, cheap medicine with a proven safety-record that many countries had success with against Covid - why was it banned in Australia in favour of experimental vaccines?

Ans: *We are not horses. Secondly, the vaccines created tremendous economic wealth that Ivermectin would not have been able to achieve. Sylvia …*

How about Hydroxychloroquine combined with zinc?

Ans: *There is no consensus amongst Health Experts that Hydroxy is beneficial against Covid. A large study published in Lancet proved it to be ineffective*. Allaine
But that study was withdrawn after it was found to be fraudulent.

Ans: *There was also The Recovery Trial, led by Sir Jeremy Farrar, now World Health Organization's Chief Medical Officer, which showed that Hydroxy could even be dangerous when administered in doses that are 4-times the potency of normal doses.* Lou …

Why were subjects given quadruple strength?

Ans: *This Inquiry is not about second-guessing THE Science Experts. It's about joining together, consolidating inquires that have already been done, & being positive. Romaine …*

Ex-head of Australian Medical Association, Kerryn Phelps said: *Regulators of the medical profession have* ***censored public discussion*** *about adverse events following immunisation, with* ***threats to doctors*** *not to make any public statements about anything that 'might undermine the government's vaccine rollout' or risk suspension or* ***loss of their registration****.*

Why were doctors threatened with loss of registration for talking about health matters?

Ans: I am not here to promote the ravings of Kerryn Phelps, a well known conspiracy theorist. I hope she's ok. I encourage her to avail herself of our world-leading mental health industry in Australia.

But she was head of AMA …

Ans: *As I've already said, I want to ensure that we're positive, that the process of learning from the pandemic is constructive, rather than destructive. It's not censorship - it's messaging. Thanks, that's all we've got time for today.*
